

PARK & RIDES

Express Park and Rides are coming to the northwest part of Las Vegas in late 2009

The park and ride facilities are anticipated to reduce the increasing congestion on US-95 due to the growth in travel demands within that roadway and they will also complement the introduction of express transit service from the northwest using the newly constructed High Occupancy Vehicle (HOV) lanes on US-95.

Transit Terminal and Park and Rides will include:

- Approximately 1,000 surface parking spaces for cars
- Approximately six transit bays for future express transit service and local routes
- Van pool accommodations
- "Kiss and Ride" areas
- Security
- Ticket Vending Machines (TVMs)

South Strip Transfer Terminal Now Open
