

APPENDIX 1

CAPITAL PROGRAM PROJECT LISTS

Background

This Appendix contains additional information about the projects included in the RTP, TIP and in the travel demand model used in the air quality conformity determination.

Table 1 describes all of the projects included in the Transportation Capital Program from 2009 to 2030, irrespective of funding source or whether or not they are considered to be Regionally Significant.

Table 2 contains detailed funding information for the Regional Strategic Investments included in the Regional Transportation Plan, as set out on pages 95-107 of the RTP

Table 3 identifies the projects that are included in the regional travel demand forecast model network that was used in the air quality conformity analysis for the RTP.

APPENDIX 1, TABLE 1

TRANSPORTATION CAPITAL PROGRAM, 2009-2030

This table lists all of the projects included in the Transportation Capital Program from 2009 to 2030, irrespective of funding source or whether or not they are considered to be Regionally Significant.

The projects are listed in alphabetical order of street name or project title.

The data shown includes the limits of the project, the project description, the sponsoring agency, and the year when the project is expected to be complete.

The final column indicates whether the project is considered to be “Regionally Significant” and how the project is treated in the travel demand modeling and air quality conformity analysis. The classifications shown in this final column are described below:

ModelClass	Description
RS	Regionally Significant Project
RS-T	Regionally significant transit project included in mode split model
NRS-M	Non-regionally significant project included in travel demand forecast model
NRS-T	Non-regionally significant transit project included in mode split model
TCM	Transportation Control Measure identified in the State Implementation Plans (SIP)
TCM-T. TCM-A	Transit or alternate Mode Transportation Control Measure identified in the SIP
OCM	Other control measure for which emissions credit could be calculated (#)
OCM-T, OCM-A, OCM-I, OCM-O	Transit, alternate mode or ITS project or operational improvement for which emissions credit could be calculated (#)
EX	“Exempt” Project or project exempt from regional emissions analysis
EX-T, EX-A, EX-I, EX-O	Exempt transit, alternate mode or ITS project or operational improvement
EX-IR	Exempt ITS project on a regionally significant facility
EX-P	Planning, Preliminary Engineering or Right-of-Way safeguarding only.
ONX	Other non-exempt project - not modeled
ONX-T	Other non-exempt transit project - not modeled
XTDM	Project outside the travel demand forecast model area
XNAA	Project outside the Ozone non-attainment area

(#) Projects designated “OCM” are considered to have potential air quality benefits, but these have not been calculated as part of the current conformity determination.

Projects in the classifications shown above in **bold face** are included in the RTP list of Regional Strategic Investments, irrespective of funding source. That list also includes all other projects that are federally funded or involve federal action.

The travel demand forecast modeling used in the air quality conformity analysis includes all projects classified as “RS” or “NRS-M”. Table 3 lists these projects and also shows the Horizon Year in which each project is expected to be complete.
