Roadwork on Sahara Avenue in the western part of the valley begins Feb. 28

LAS VEGAS – Work on the Regional Transportation Commission (RTC) of Southern Nevada’s Sahara Express rapid transit project will result in travel lane restrictions on Sahara Avenue between Hualapai Way and Durango Drive beginning Feb. 28.

One travel lane in each direction on Sahara Avenue will be closed between Hualapai Way and Durango Drive beginning at 7 a.m. on Monday, Feb. 28. Two travel lanes on Sahara Avenue in this area will remain open to traffic in each direction. Road work will occur during the day and at night. Day work will occur from 7 a.m. to 3:30 p.m., Monday through Friday, and night work will occur at the intersections from 9 p.m. to 5 a.m., Monday through Friday.

Work in this area will consist of sidewalk removal and replacement, electrical work, transit shelter pad construction and landscape improvements.

While work is taking place, drivers should take precautions and allow extra time when traveling through the impacted area. Lane restrictions are also in effect on Sahara Avenue between Boulder Highway and Las Vegas Boulevard. Those restrictions will be in effect for the duration of the project’s construction, expected to be complete in early 2012.

The Sahara Express will be another addition to the RTC’s expanding network of rapid transit services. The Sahara Express rapid transit line will include dedicated transit lanes along much of Sahara Avenue, from Hualapai Way in the western part of the valley to Boulder Highway in the east. The Sahara Express will then branch to serve neighborhoods north and south of Sahara Avenue and will also connect to the RTC’s Deuce on the Strip, Strip & Downtown Express and Boulder Highway Express routes.

The RTC received \$34.4 million in federal American Recovery and Reinvestment Act economic stimulus grant funds for the rapid transit project to improve mobility, connectivity and accessibility in Las Vegas and help spur local economic growth. The project is expected to create nearly 500 private-sector jobs.

In addition to the new rapid transit lanes, the project will also feature solar powered transit shelters, ticket vending machines, elevated station platforms, and improvements to traffic signals along Sahara Avenue that will improve travel for both cars and transit operations.

The RTC is the transit authority, transportation planning agency and regional traffic management agency for Southern Nevada. The RTC’s vision is to provide a safe, convenient and effective regional transportation system that enhances mobility and air quality for citizens and visitors. The RTC encourages residents and visitors to use alternate commute modes to help reduce traffic congestion, clean the air and improve the quality of life in Southern Nevada.
